- Output

Frontend: WEB

Testing Backend: POSTMAN

Postman interface showing a GET request to `http://localhost:5000/api/todos/`. The response is **200 OK** with a status of 461 ms and 523 B. The response body is JSON, showing a list of three todos:

```
1 [
2   {
3     "_id": "6904a491c8183b9a64511d6f",
4     "title": "DAA Project",
5     "completed": true,
6     "__v": 0
7   },
8   {
9     "_id": "6904a49dc8183b9a64511d71",
10    "title": "FullStack Project",
11    "completed": true,
12    "__v": 0
13  },
14  {
15    "_id": "6904a4a7c8183b9a64511d73",
16    "title": "PBLJ Project",
17    "completed": false,
18    "__v": 0
19  }
20 ]
```

Backend Database – MongoDB

MongoDB Data Explorer interface showing the `todos` collection. The interface displays three documents in the `Cluster0 > test > todos` path. The documents are:

- `{ "_id": ObjectId('6904a491c8183b9a64511d6f'), "title": "DAA Project", "completed": true, "__v": 0 }`
- `{ "_id": ObjectId('6904a49dc8183b9a64511d71'), "title": "FullStack Project", "completed": true, "__v": 0 }`
- `{ "_id": ObjectId('6904a4a7c8183b9a64511d73'), "title": "PBLJ Project", "completed": false, "__v": 0 }`
